### DETAILED ACTION

1. Applicant's election with traverse of Group I claims 1-5, 8-16 and 20 in Paper No. 9 (1/2/03) is acknowledged. Applicant's remarks have been considered and are found to be persuasive with respect to the unity of invention. Therefore, Groups I, II and III will be combined together and examined. Thus, claims 1-20 are pending.

2. However, this application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(a) An enhancing agent from: (1) xanthine and its derivatives, (2) pyrimidinol, (3) pyrimidinone, (4) 2-amino-5-bromo-6-methylpyrimidinol, (5) 2-amino-6-methyl-4-pyrimidinol and (6) thymine;

(b) An organic solvent from: (1) non-aromatic ketones, (2) aliphatic amides, (3) cyclic amides, (4) alkylated aliphatic urea, (5) cyclic urea, (6) alkylated aliphatic sulfoxides and (7) cyclic sulfoxides;

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 1647

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

(i) Claim 1 is contains patentably distinct species of the enhancing agent and the organic solvent

(ii) Claims 8 and 20 contain patentably distinct species of the enhancing the organic solvent

The following claim(s) are generic: 1, 8 and 20.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The enhancing compounds do not share a common structure. Similarly the organic solvents do not share a common structure.
